DETAILED ACTION

Allowable Subject Matter

1. Claims 1-25 are allowed.
2. The following is an examiner's statement of reasons for allowance: claims are allowable at least for the reason that the prior art does not teach or reasonably suggest the outer arm assembly that is recessed back from the distal end towards the bracket to allow the pinion drive shaft to travel towards the bracket behind the front portion of the outer arm assembly as set forth in the claimed combination (claims 1-19), any two of the inboard, outboard and intermediate contact surfaces are fixed with respect to the inner arm assembly and the other of the inboard, outboard and intermediate contact surfaces is resiliently moveable and outwardly biased with respect to the inner arm assembly as set forth in the claimed combination (claims 20-23) and the wedging action reduces the tendency for slippage to occur between the driven wheel and the driven portion as set forth in the claimed combination (claims 24 and 25). Foote et al (US 6,755,543 B1) discloses a vehicle mirror having an extension (see Fig. 1) and retraction mechanism (see Fig. 2) for a pair of telescopic arms (see Figs. 1 and 2) that connect a mirror head (12) to a mirror mounting bracket (18),

the assembly comprising a pair of spaced apart parallel hollow outer arm assemblies (36 and 38), a pair of spaced apart inner arm assemblies (32 and 34), a pair of driving pinion gears (see Fig. 1, 26), a pinion drive shaft assembly (see Fig. 4, 56 and 76), a drive motor (62), and a gear train (72). However, Foote et al does not disclose the outer arm assembly that is recessed back from the distal end towards the bracket to allow the pinion drive shaft to travel towards the bracket behind the front portion of the outer arm assembly as set forth in the claimed combination, any two of the inboard, outboard and intermediate contact surfaces are fixed with respect to the inner arm assembly and the other of the inboard, outboard and intermediate contact surfaces is resiliently moveable and outwardly biased with respect to the inner arm assembly as set forth in the claimed combination or the wedging action reduces the tendency for slippage to occur between the driven wheel and the driven portion as set forth in the claimed combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
